

UNDERGRADUATE RESEARCH OPPORTUNITY

I would be interested in working with a curious, energetic undergraduate student. We are involved in high-end, novel numerical simulations of fluid dynamics with applications to oceanic phenomena. The interested student can check out publications from:

<http://www.rsmas.miami.edu/personal/tamay/index2.html>

Our group meets regularly on Friday afternoons (typically at 2 pm, sometimes at 3 pm). In the past, I've had students contacting me, but transportation issues back and forth appeared to overcome their desire to join us. I would be happy to chat if there is an interested student.

Thanks,

Tamay M. Ozgokmen
