Did you know 80 dolphins and 350 manatees have died in the past year in the Indian River Lagoon?

Are these marine mammals sending an early warning for the future of human and environmental health? Learn more about newly emerging diseases, neoplasia, immune dysfunction, and hematologic and biochemical abnormalities.

**Marine Mammals As Sentinels For Ocean And Human Health**

**Presented By**

**Gregory Bossart, V.M.D., Ph.D.**

Senior Vice President of Animal Health, Research, and Conservation and Chief Veterinary Officer, Georgia Aquarium

The University of Miami Leonard M. Miller School of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit. Physicians should only claim the credit commensurate with the extent of their participation in the activity. Drs. Bossart, Andrews, Ganjej-Azar, Nadji, and Norenberg have indicated that they have no relevant financial relationships with commercial interests.
