SEMINAR SCHEDULE  
Tuesday, May 24

Session V, Tuesday

9:20 – 9:40  Patrick Kilduff, University of California Davis  
Understanding the Influence of a Variable Ocean Environment on Chinook Salmon Population Dynamics

9:40 — 10:00  Dan Goethel, University of Massachusetts  
Spatial Modeling of Yellowtail Flounder Population Dynamics

Session VI, Tuesday

10:20 — 10:40  Skyler Sagarese, Stony Brook University  
Assessing Spiny Dogfish Migration and Population Dynamics in the Northwest Atlantic

10:40 — 11:00  Dovi Kacev, San Diego State University  
Incorporating Genetic Data into a Population Assessment for Pelagic Sharks

11:00 — 11:20  James Thorson, University of Washington  
Agent-based Model Evaluation of Methods to Estimate Annual Abundance for Shoaling Fishes such as Pacific Rockfish

11:20 — 11:40  Sam Truesdell, University of Maine  
Spatial Dynamics in Fisheries Stock Assessment
