Special Lecture

Linking Community Health with Marine & Atmospheric Science: Opportunities for Collaboration

Friday, December 11, 2015

Alberto J. Caban-Martinez, DO, PhD, MPH

Alberto J. Caban-Martinez is an assistant professor of public health sciences at the University of Miami, Miller School of Medicine, Instructor of Orthopedic Surgery at Harvard Medical School and Fellow of the National Academy of Science’s Gulf Research Program. He has written over 84 peer reviewed publications and presented over 126 scientific presentations on a wide range of topics including the prevalence of health behaviors and indicators (e.g., physical activity, smoking, obesity, ocular conditions and alcohol consumption) among US workers. He has an active program of research in the development and evaluation of work environment interventions to reduce and prevent work-related injuries and musculoskeletal disorders. Dr. Caban-Martinez is also interested in the connections between public health and marine and atmospheric sciences.

Agenda

4:00pm  Lecture and Q&A
         SLAB Seminar Room

4:45pm  Breakout Discussion
         SLAB Seminar Room

5:30pm  Informal Discussion
         Wetlab

University of Miami Rosenstiel School
4600 Rickenbacker Cswy, Key Biscayne, FL

RSVP: mps@rsmas.miami.edu
