MBF’s Guest Speaker:
Dr. Daniel Pauly

The University of British Colombia Professor, Fisheries Centre & Zoology; Principal Investigator, Sea Around Us Project

Dr. Daniel Pauly is a French citizen who completed his high school and university studies in Germany; his doctorate (1979) and habilitation (1985) are in Fisheries Biology, from the University of Kiel. After many years at the International Center for Living Aquatic Resources Management (ICLARM), in 1994 Dr. Pauly became a Professor at the Fisheries Centre of the University of British Columbia, of which he was the Director for 5 years. Since 1999, he has served as the Principal Investigator of the Sea Around Us Project. The concepts, methods and software which Dr. Pauly (co-)developed are documented in over 500 scientific and general-interest publications, and are used throughout the world. He is the recipient of various awards, including the Award of Excellence of the American Fisheries Society, the International Cosmos Prize, the Volvo Environmental Prize, the Excellence in Ecology Prize, and the Ramon Margalef Prize in Ecology.
